Cloud Based Deployment

Organization Type: NCPMI is a non-profit, making cloud-based servers a more suitable choice compared to on-prem servers.

Cost & Scalability: On-prem servers are costly and challenging to scale. Cloud servers offer better scalability, essential for NCPMI's expansion.

Maintenance: Cloud servers require less equipment and fewer personnel to maintain.

Security Needs: Cloud solutions demand more in-depth security measures. Implementing strict data protection policies is crucial to safeguard member data.

Cloud Based Deployment

Upfront Cost

Expenses	On-Premise Servers	Cloud	Web Applications
Server(s) Hardware	$5,500	Included	N/A
